## Om brugen af registret

Den trykte udgave i fire bind af Nordbyslægter er forsynet med et navneraster i retvendt form. Det vil sige at navnene er alfabetiseret efter fornavne således:

|                               |            |
|-------------------------------|------------|
| Linda Christensen .....       | 2328       |
| Linda Dahl Andersen .....     | 2767       |
| Linda Døssing .....           | 2898       |
| Linda Egstrøm Pileborg .....  | 3042       |
| Linda Elsebeth Ager .....     | 2515       |
| Linda Feist.....              | 3181       |
| Linda Fischer Lindfeld.....   | 1826       |
| Linda Gail Pattern .....      | 491        |
| Linda Girke .....             | 2500       |
| Linda Godtfredsen.....        | 2657       |
| Linda Hansen .....            | 2430, 3230 |
| Linda Heidi Knudsen .....     | 1426       |
| Linda Hjul Iversen .....      | 597        |
| Linda Iversen.....            | 258        |
| Linda Kofoed Jensen.....      | 2887       |
| Linda Krohn Dehli .....       | 1551       |
| Linda Kromann Anthonisen..... | 40         |
| Linda Kronborg Jensen .....   | 2915       |
| Linda Laprad .....            | 1554       |
| Linda Larsen.....             | 3436       |
| Linda Lauridsen .....         | 2785       |

Det kan være hensigtsmæssigt i visse situationer, men meget ofte vil man mangle en alfabetisk indgang til efternavnene.

### Alfabetisk register efter efternavne

Det er der med dette register nu rådet bod på.

### Gode søgemuligheder. Print ikke registret ud!

For at få mest muligt ud af registret anbefales det at placere det et hensigtsmæssigt sted på computeren (PC eller MAC). Herved får man nogle helt anderledes gode søgemuligheder, som man ikke har i en udprintet udgave. Endelig sparer man papir ved ikke at skulle udskrive 274 sider!

### Indholdet fordelt på de fire bind

Bind 1: Side 1-992

Bind 2: Side 999-1984

Bind 3: Side 1990-2944

Bind 4: Side 2950-3540 samt register.

### Sådan bruger du bedst registret

Når du vil søge på et navn, er der forskellige muligheder.

#### "Sjældne" efternavne

Er efternavnet ikke helt almindeligt, kan det være en fordel *kun* at søge på det, f.eks. efternavne som

*Abro, Nors, Price, Rahbek.*

#### Udbredte efternavne

Drejer det sig om mere udbredte navne, kan det være en fordel at skrive efternavnet efterfulgt af et komma, et mellemrum og dernæst kun begyndelsen af fornavnet, f.eks.:

*Andersen, B*

*Poulsen, A*

da man ellers kan risikere at få 0 hits eller at være kommet "forbi" det ønskede navn.

#### Efternavne med to fornavne, to efternavne eller et mellemnavn

Drejer det sig om en person med to eller flere led, kan det være en fordel kun at skrive den sidste del af efternavnet efterfulgt af det første fornavn, f.eks.: *Marie Kathrine Andersen, Søren Jepsen Pedersen* eller *Peter Sandahl Skov*:

*Andersen, Marie*

*Pedersen, Søren*

*Skov, Peder*

### **Mellemlnavne**

På hvilken plads et mellemnavn har i et længere navn kan være svært eller umuligt at vide. F.eks. *Wilhelm Martin Winckler Anckersen* eller *Emilie Amina Munch Smedegaard*. Derfor kan det være en fordel i første omgang udelukkende at søge på det pågældende (gerne specifikke) mellemnavn:  
*Winckler*  
*Amina*

### **Pigenavne - Dåbsnavne og tilgiftede navne**

Gifte kvinder kan søges under mandens efternavn eller på pigenavnet fra dåbsattesten. *Lise Balle* født *Lise Juhl Christensen* kan både søges under *Balle*, hvorefter man må prøve sig frem til den "rigtige mand", men kender man pigenavnet, kan hun også og langt hurtigere søges under *Christensen, Lise*.

### **Wildcard, helgardering eller trunkering**

I PDF-filer kan der ikke søges med wildcards (\* eller ?). Er man usikker på stavemåden, må man forsøge sig frem:  
*Sonnich* eller *Sonnick*  
*Cathrine, Catrine, Katrine*  
*Anckersen, Anckersen*
